22nd Global Conference of Sustainable Manufacturing

Workshop on Circular Manufacturing for Sustainable Future

The GCSM brings together researchers, industrial practitioners, policymakers, and innovators from across the world to exchange knowledge, showcase achievements, and discuss pathways to a more sustainable industrial future.

As Sri Lankan manufacturers navigate rising resource costs, supply chain disruptions, and increasing sustainability requirements across local, regional, and global markets, sustainable manufacturing is becoming a key driver of competitiveness and market access.

This is particularly relevant for local value-adding industries targeting import substitution and export-oriented industries serving international markets, where expectations regarding environmental performance, transparency, and circular economy practices continue to grow.

To support organisations in addressing these challenges and opportunities, GCSM 2026 will feature a dedicated Industry Day on 24th September 2026. Designed specifically for industry professionals, the programme will provide practical insights into sustainable manufacturing and circular economy implementation, highlight emerging international trends and expectations, and facilitate dialogue among industry leaders, academics, and sustainability experts. Participants will leave with actionable ideas and a clearer understanding of how sustainability can create value within their organisations.

TARGET AUDIENCE

Professionals of Manufacturing & other industries | Sustainability & Circular Economy | Research, Policy & Innovation

TOPICS COVERED

How to overcome export barriers into foreign markets in the context of European Ecodesign and Sustainability Initiatives?

Role of engineering education in sustainable manufacturing

Sustainable Manufacturing and Business Growth - Concepts, drivers, and value creation

Role of Life Cycle Engineering and Management in Sustainable Manufacturing

24th September 2026 | Cinnamon Lakeside, Colombo, Sri Lanka

Scan to Register

Only Limited Seats Available

Investment: LKR 40,000/=

(Includes Conference Dinner at Lotus Tower)

Industrial Panellists

Mr. Sena Peiris

Chair, National Expert Committee
on Climate Change Mitigation,
Sri Lanka

Mr. Thusith Gunawardena

CEO, INSEE SiamCity Cement
Sri Lanka

Ms. Smita Pandit Chakraborty

CEO, Continental Specialty
Tires, Sri Lanka

Ms. Prashani Illangasekera

Co-Founder & Director, ESG
at AlchemX Global Solutions

Dr. Jagathdeva Vidanagama

Chief Technical Specialist -
Accelerating Industries
towards decarbonization UNIDO
